

Trade Data Monitor (TDM)

Value Added Comparison

	Trade Data Monitor (TDM)	UN Comtrade	ITC TradeMap
Country Coverage *Based on consistently updated countries; no gaps in data or historical data only (i.e. excluding Afghanistan publishing monthly data for a couple years back in 2010 or so).	Trade Data Monitor (TDM) publishes official trade statistics for 130+ consistently reporting countries with a time lag of 1-3 months typically. Data is more frequent and updated daily with monthly trade data. Various trade models available for some countries (i.e. US general vs US consumption). For reporting countries that do not publish official trade data, TDM can provide mirrored versions of these countries as an “estimate” and will be clearly marked as mirrored. Additional data fields (ADF) such as ports, provinces, U.S. Calculated Duty Paid, transport mode, re-export, etc. is available for some countries. Revisions are included and updated the most frequent in the industry, including daily U.S. correction checks.	As of January 2026: TDM is 6+ months ahead in 39 reporting countries. TDM reports data for 29 more reporting countries that UN Comtrade does not. *Ask us to send you a direct comparison.	As of January 2026: TDM is 6+ months ahead in 37 reporting countries. TDM reports data for 29 more reporting countries that TradeMap does not. *Ask us to send you a direct comparison.
